

KHUE HOANG AN VO

763-321-8277 | vo005642@stthomas.edu | [linkedin.com/in/khue-vo](https://www.linkedin.com/in/khue-vo)

EDUCATION

University of St. Thomas, St. Paul, MN
BS in *Computer Science*
Minor in *Business Administration*

Dec 2026

RELATED SKILLS

Programming languages: Python, Java, Java Script, SQL.

Frameworks & Libraries: React, Node.js, Express, Flask.

Databases: MySQL, PostgreSQL, MongoDB, SQLite.

Front-End & Tools: HTML3, CSS3, PyCharm, IntelliJ IDEA, Eclipse, Git/GitHub.

Core Competencies: Full-Stack Development, Backend Architecture, Database Schema Design, RESTful APIs, Agile Methodologies, Cross-functional Collaboration.

EXPERIENCE

AgilitiIO – Backend Development Intern

June 2024 – August 2024

- Designed, built, and deployed a robust Command Line Interface (CLI) application using Python and SQLite.
- Architected relational database schemas and implemented business logic layers to ensure clean data validation and structured storage.
- Applied advanced object-oriented programming (OOP) principles in Python to write scalable, reusable, and easily maintainable backend source code.
- Utilized DB Browser for SQLite to run queries, test database constraints, and optimize performance during development.

University of St. Thomas – Customer Relationship Management Intern

June 2025 – Now

- Architect, build, and deploy high-volume mass emails using Salesforce Marketing Cloud (SFMC), strictly adhering to university brand guidelines and layout standards.
- Audit and update system components, including dynamic email names, sender profiles, and global unsubscribe footers, ensuring 100% compliance with federal CAN-SPAM Act regulations.
- Act as the primary technical point of contact for marketing operations, resolving complex helpdesk ticketing requests across SFMC, Outlook Email, Outlook Newsletter, and Mogli SMS.
- Managed and maintained an 8-week SFMC training course hosted on Canvas, coordinating technical onboarding, scheduling course communications, and tracking completion metrics for internal team members

PROJECTS

GreenStep Challenge Admin Platform | CISC 480 – Senior Capstone Project
Lead Backend Developer & Database Architect | Spring 2026

- Collaborated in an Agile development team to architect a robust admin platform using React for the user interface and Supabase/PostgreSQL for data management.
- Designed the relational database schema, authoring and executing complex SQL migration scripts to handle high-volume user activity and system logs.
- Implemented strict role-based access control (RBAC) and secure authentication layers to protect sensitive administrative endpoints and isolate user roles.

- Participated in multi-week sprints, managing tasks, conducting code reviews, and presenting project milestone deliverables during senior capstone evaluations
-
